## COMMUNITY SURVEY

### COMPREHENSIVE QUALITY OF LIFE & DISABILITY SURVEY

Siksika Nation members are encouraged to participate in the Comprehensive Quality of Life & Disability Survey, which will help identify community needs, service gaps, and barriers affecting daily life on reserve. The survey is open to all community members, including those responding for themselves or their families. A formal diagnosis is not required— participants may share any challenges they experience, including physical, cognitive, sensory, mental health, developmental, or other factors that impact quality of life.

#### **Your input will help guide:**

- Future funding opportunities
- Program development
- Improved services across the Nation
- Nation-wide assessment of needs and supports

We strongly encourage honest feedback, comments, and concerns. Every response adds value and helps strengthen services for our people.

***For every 100 surveys completed, a draw will be held for a 50"+ TV.***

***All community members are welcome to participate and share the survey with family, friends, clients, and households.***
